CONSERVING WATER TODAY FOR ARIZONA'S TOMORROW

Dude, you are wasting  
our precious water!

Life cannot exist without water. And yet, most of us take it for granted. As long as water comes from our faucets, is clean and ready to use, we don't even think about how much there is or how it is used! Our water needs are changing as more and more people move to Arizona. We must conserve water to make sure that we will always have enough! We have to remember that water conservation isn't just a word, it is a way of life. It is up to you to help make a difference and get the word out that conserving water is the right thing to do.

What does CONSERVATION mean to you? \_\_\_\_\_

# WATER CONSERVATION TIPS

⌚ Limit your showers to 5 minutes ⌚ Turn off the water when brushing teeth and washing hands ⌚ Use a bucket of water to wash a car, then rinse quickly with a hose ⌚ Check for and fix leaks! A dripping faucet can waste more than 3,000 gallons of water a year. ⌚ Encourage others to install low-flow showerheads, faucets, and toilets ⌚ Reduce evaporation loss by watering your yard in the morning or evening. ⌚ Talk to your family, friends and neighbors about the importance of saving water!

Can you come up with 5 other ways to conserve water at home?

1.

2.

3.

4.

謝哈明榮謝樓.....

Share your answers with a friend or your parents.  
Spread the word that water conservation is the right thing to do!

## Looking for more information?

For more information on what you can do to save water at your home, school or in your community, check out the following websites:
